## **DETAILED ACTION**

### ***Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-49, 58-59 are drawn to system and method of providing an integrated financial and transaction management services system over a network.
- II. Claims 51-56 & 67-71 are drawn to a method of aggregating information using aggregating indicia.
- III. Claim 57 is drawn to a method of compiling information.
- IV. Claim 60-66 are drawn to a method of providing a guarantee as to the financial ability of a buyer to pay a commercial obligation to a seller.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the information that is aggregated could be used in various applications not limited to use with Invention 1. See MPEP § 806.05(d).

Art Unit: 3627

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as the information that is compiled could be used in various applications not limited to use with Invention 1. See MPEP § 806.05(d).

Inventions I and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as a guarantee could be provided in various applications not limited to use with Invention 1. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the information that is aggregated could be used in various applications not limited to use with Invention III. See MPEP § 806.05(d).

Inventions II and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the information that is aggregated could be used in various applications not limited to use with Invention IV. See MPEP § 806.05(d).

Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as the information

that is compiled could be used in various applications not limited to use with Invention IV. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each Invention unique, restriction for examination purposes as indicated is proper.

***Election***

If Applicant selects Invention I, further election of species is required.

Claims 1-19, 31-35, 37, 40- 43 & 48 are generic to a plurality of disclosed patentably distinct species comprising:

A. Claims 20, 21, 22, 44, 50, 58 and 59 drawn to a method of providing an integrated commercial transaction management service system with a finance system performing domestic trade credit underwriting.

B. Claims 23, 34, & 45 drawn to a method of providing an integrated commercial transaction management service system with a finance system performing dispute resolution.

C. Claims 25, 26, 27, 28, 29 & 46 drawn to a method of providing an integrated commercial transaction management service system with a finance system performing transaction management

D. Claims 30, 36, 38, 39 & 47 drawn to a method of providing an integrated commercial transaction management service system with a finance system providing financing.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Art Unit: 3627

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Kramer whose telephone number is (703) 305-5241. The examiner can normally be reached on Monday - Friday (8AM - 5PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Chilcot can be reached on (703) 305-4716. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-3687 for regular communications and (703) 872-9327 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1113.
